

As Amateur Radio operator. I feel the pation the ARRL has filed would bring in a lot of young people to our hobby. By allowing a NOVICE to have HF and UHF/VHF spectrum . Also I feel that TEC & TEC + have taken the writen test and should not need to take any further testing. As for the code It has gone by the way side and if those who want to use code can keep on but it should not be a test to upgrade thank you
